About This Game

Story

In Peku you control the dragon Peku which was inspired by the Aztecs divinity Quetzacoatl. After his birth his task was to cause complete entropy in the universe by the destruction of all alien worlds.

Gameplay

Help Peku destroy all the worlds and keep him alive without getting hit by the many attacks from technology of all alien worlds in the Universe!

How to play:

Peku is fully controlled with the mouse. Point and Click in the direction Peku should fly while avoiding enemy lasers and attacks. Peku's tail grows with each planet he devours. As long as your tail is sticking out you are fine but the more you lose of it the more you are in danger. If you get hit by one of the lasers, with no tail part attached to you, it's Game Over. Try to survive as long as possible.
