This game is in the full meaning of the world a colony builder. I can not over state this fact, there is only the single player campaign to go through and most of that is you gussed it building up and maintaining your colony. Having said that this is a fun game for all you world builders out there and only for you, sorry to say this game is not for every buddy. In closing, Fun but not worth the 15\$ price tag.. Worth the \$0.64 I paid for it.. All Might = Best girl.. Literally crashes before it properly opens. A straight up scam, I'm refunding asap. As a fan from the very first game back in 1995 and the ones that followed I am not disappointed at all.

Still that great feeling, challenging without being impossible. Real challenge this time on managing your ammo (most of the time you'll switch weapons with the ones you pick on corpses, ammo is in very limited supply)

Still pretty early in the game but it seems access to good weapons won't come easy.

On the minus side: the game doesn't look like much but it does consume a lot of CPU/graphic card power, was planning to play on the laptop plugged in the big TV but it was so slow, impossible to play: had to give up and install it on the gaming computer. Sad that the turn system stay even once all enemies are eliminated sure you can remote loot but still have to move turn by turn within the movement limits.

magnet magnet magnet. I can eat rocks.

10/10. I loved this game, the negative reviews are just from salty haters who dont understand rick and morty and didnt like the last jedi, luke dies btw, these people are idiot, the graphics and intence qultiy of nthisd gma e is oso great i had two uphgera.de my PC tpo an 10800000000000000 I love it so much their ar alwa7s sevres opexn, and always full of players the flal dadwmage aein this game is the best in any gme ive evr plsyed, becuca e u like in othrn gams when yoyu fall thre feet your shins break and blood flys evrywher, jut lik in reel life . I also like the gunz they are very very graet and i like themm bcuz they wrok reaily well and I als o. I am NOT sure where to begin. I bought this game in hopes that a family member and I may play it together, that is NOT going to happen. I can not even get the game to actually start playing. The install errored, and after trying four times the game started up but in a small 800x600 (maybe) window. the opening screen, a Typhoon jet flying at differing camera views, will NOT stop playing. I am unsable to start an actual game and control the airplane. Also, the graphics are on par with a Win98 game.

If you can buy this at 80% off ~and~ you feel like trying to troubleshoot the issues, give it a go. It "might" be some fun.. Over all the game is simple, shoot the bad guys and try to live. There are from what I can tell about 5 enemies and maybe 10ish map layouts making each level stupid easy or impossible.

Major reasons that I can't recommend this game:

- No real advancement in your character, the enemies, or the game -- very repetitive game play
- No explanation of what items are or do. Having a description of what each wand does (hats as well IF they do anything) would have been nice.
- Potion seller does not do anything
- Enter arena does not do anything
- There does not seem to be any end to the game or a win condition, unless you have to literally clear a ton of floors.. If so a level counter or progress meter should be added.

. Kaos studios has some talent behind their games, however it doesn't seem to be in the way of making the actual game.

Get frontlines for a forgettable shooter you can play once, but don't expect to be very engaged. Some of the gadgets in the game are neat, and I can see where many of the ideas for Homefront came from. Unfortunately, most of the game is boring and cookie cutter.

Frontlines also suffers from badguys take too many bullets syndrome. It's tough to kill enemies with the limited selection of weapons given to you. You might enjoy it once, but wait for a sale. Don't pay full price.. Great little filler of a game with nice innovative mechanics and a just one more play compelling style of gameplay.

You'll like this if :

- You like board games / card games - particularly filler type games
- Like simple yet thoughtful no time pressure games
- Like building things

You probably wont like this if :

- You are looking for a deep dwarf fortress synergy game
- Hate turn based games
- Dislike random card drawing

This is a turn based strategy card game that would feel right at home on an actual game table top somewhere. A two player game, each player has a set of cards to play in a turn which consist of spells, empty rooms, dwarf assignments and room assignments. Build your "tower" - with a mind to physics, fire hazards, floods et al - assign the rooms a role - to gain spell storage, mana, or more dwarves to carry out tasks and attempt to destroy the enemies arch mage room before they can do the same to you.

Like any such card game you are open to the whims of lady luck really giving you a bad day, but by and large the game is simple enough - and tactically varied enough - that luck shouldn't figure overwhelmingly for or against you.

An ideal type of game on its original platform - mobiles - but also a nice filler on a desktop for those odd 10 minutes. They should replace solitaire with this game.... Dude guys.... this game. Amazing experience. A lot more in depth than what meets the eye. Spent two hours on it last night.. Do not be fooled by the cuteness of this game. It proves that it packs a real challenge, as it mixes attributes of a typical Mario platformer, with the ability get gimmick of the Kirby games. Did I mention it's a CHALLEEEENGE?!
